Buffalo, New York.**

# RRAPISTAK

Our products are sold around the globe to multi-national clients.

Some of our customers include:

U.S. AIR FORCE

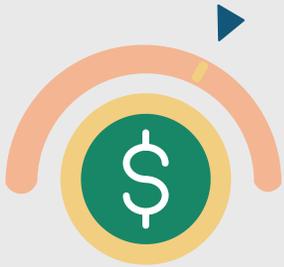

# Why automate your process?

Automation transforms manufacturing into a safer, faster, and smarter operation—delivering long-term value and resilience.

- Delivers precise, repeatable results
- Reduces human error
- Meets growing demand without extra labor

- Cuts labor and rework costs
- Reduces waste and material damage
- Lowers long-term operating expenses

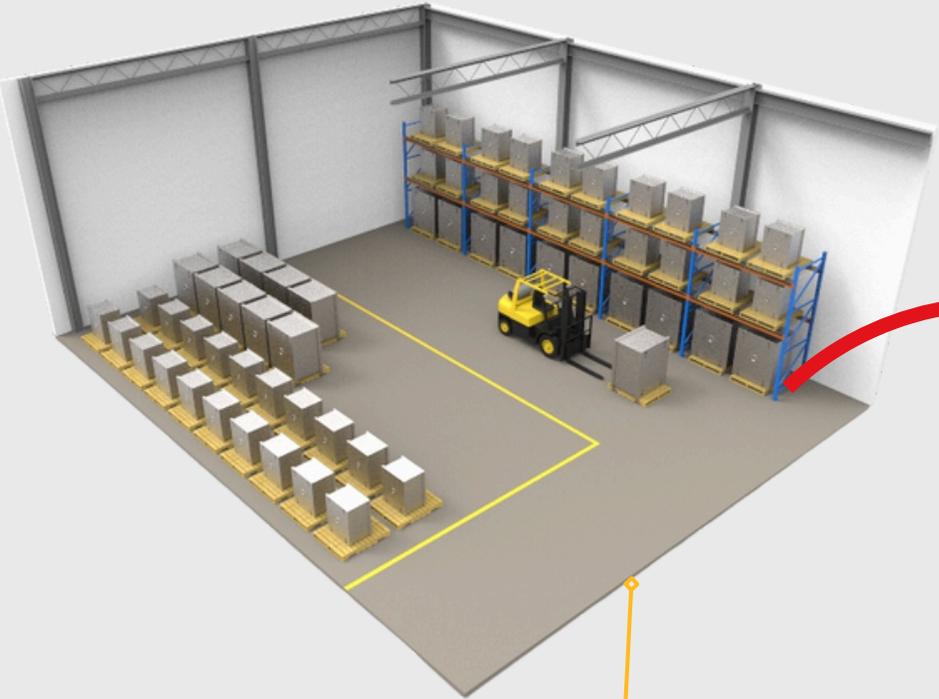

- Handles hazardous and repetitive tasks
- Reduces workplace injuries
- Creates a safer working environment

**AUTOSTAK**  
POWERFUL • INTELLIGENT • FLEXIBLE

Reduce misuse. Create efficiency.

# More Space. Less Waste.

Traditional processes involving forklifts and racking underutilize space and create inefficient production processes.

AUTOSTAK helps you regain up to 50% of your usable space and creates a safer and more efficient storage and retrieval process.

Efficient Storage. Smarter Operations. Improved Results.

# Store smarter. Move faster.

The integrated compact stacker crane is available in 2,000 to 20,000 lb lift capacities.

Forklift-free operation increases your process safety.

Fully automated parts to person storage and retrieval.

Bridge and trolley laser positioning with 360 degree mast rotation encoder.
