proudly made in the USA.**

**Our headquarters is in
Buffalo, New York.**

RAPISTAK

Our products are sold around the globe to multi-national clients.

Some of our customers include:

U.S. AIR FORCE

Improve your facility.

Why choose Leviathan?

The Leviathan stacker crane is integrated into the racking system. It is always there, ready to work, no forklift needed.

2000 hour scheduled maintenance compared with 500 hours or less for most forklifts.

Our stacker cranes lift full capacity at maximum height. There's no loss in capacity when storing on high shelves.

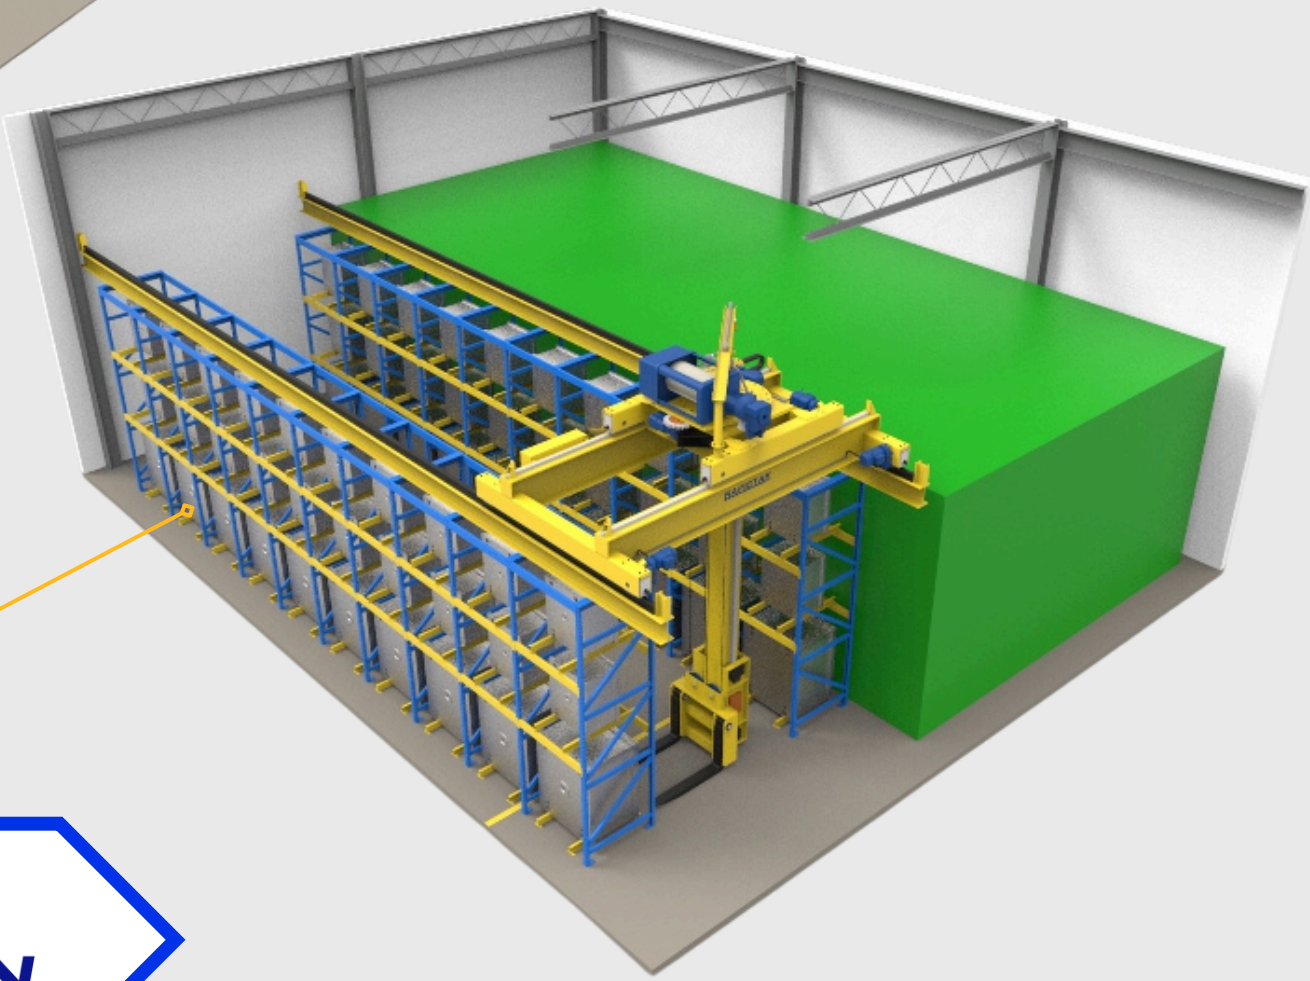

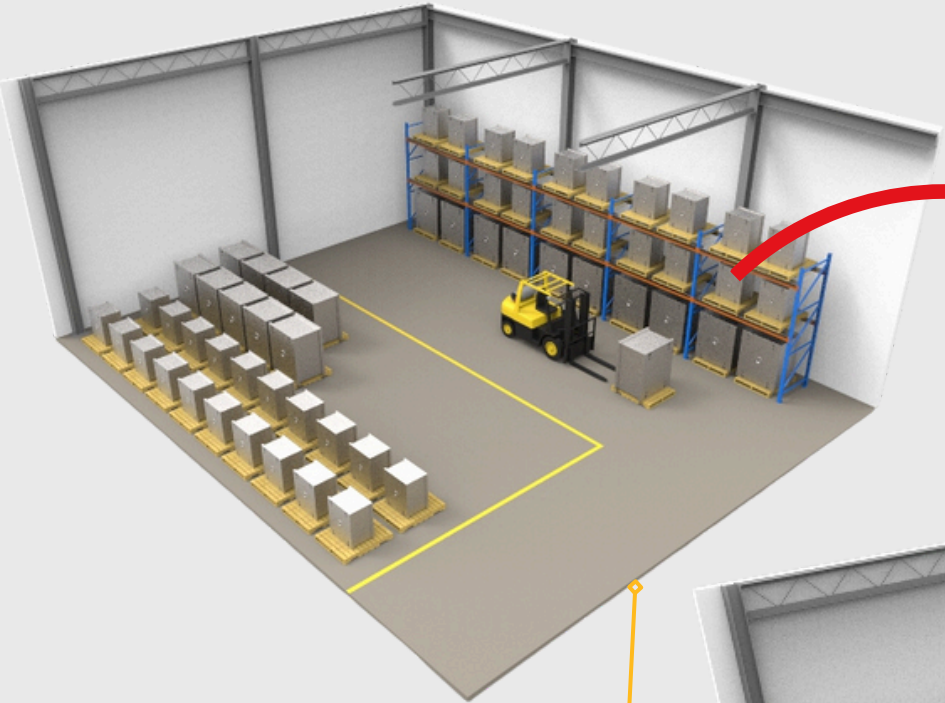

Our cranes require no batteries and no fuel, bringing down energy costs and reducing your carbon footprint.

Reduce misuse. Create efficiency.

More Space. Less Waste.

Traditional forklift and pallet racking systems underutilize available space.

LEVIATHAN helps you regain up to 50% of your usable space.

Save your aisles. Eliminate traffic.

Forklift-free and proud to be.

LEVIATHAN uses less than half the aisle space of traditional forklift and pallet racking systems, maximizing available storage space with a minimal footprint.

Strength. Efficiency. Safety.

The beast is loose.

The integrated compact stacker crane is available in 6,000 to 20,000 lb lift capacities.

Ultra-duty racking available up to 100,000 lbs per section

A smaller footprint in comparison with traditional pallet racking and forklift systems mean more storage in less space.

Find what you need for your space
