proudly made in the USA.**

**Our headquarters is in
Buffalo, New York.**

RRAPISTAK

Our products are sold around the globe to multi-national clients.

Some of our customers include:

U.S. AIR FORCE

On-demand flexibility and configurations.

MAXIMIZE YOUR SPACE

Maximize your storage space by utilizing vertical space more effectively than traditional pallet racking. Use your existing forklift with this economical solution.

No tooling required to adjust to new heights: simply lift the load carrier and reposition.

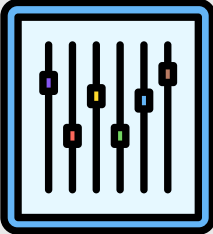

Modular system allows for incremental expansion to suit your future needs.

MAXRAK
OPTIMIZE YOUR SPACE

Improve your facility.

Why choose Maxrak?

Load carrier pallets are instantly adjustable every 6". This flexible solution gives you more material storage in less space.

Each vertical section is free-standing. The load carrier pallets can be completely removed with no structural changes to the racking.

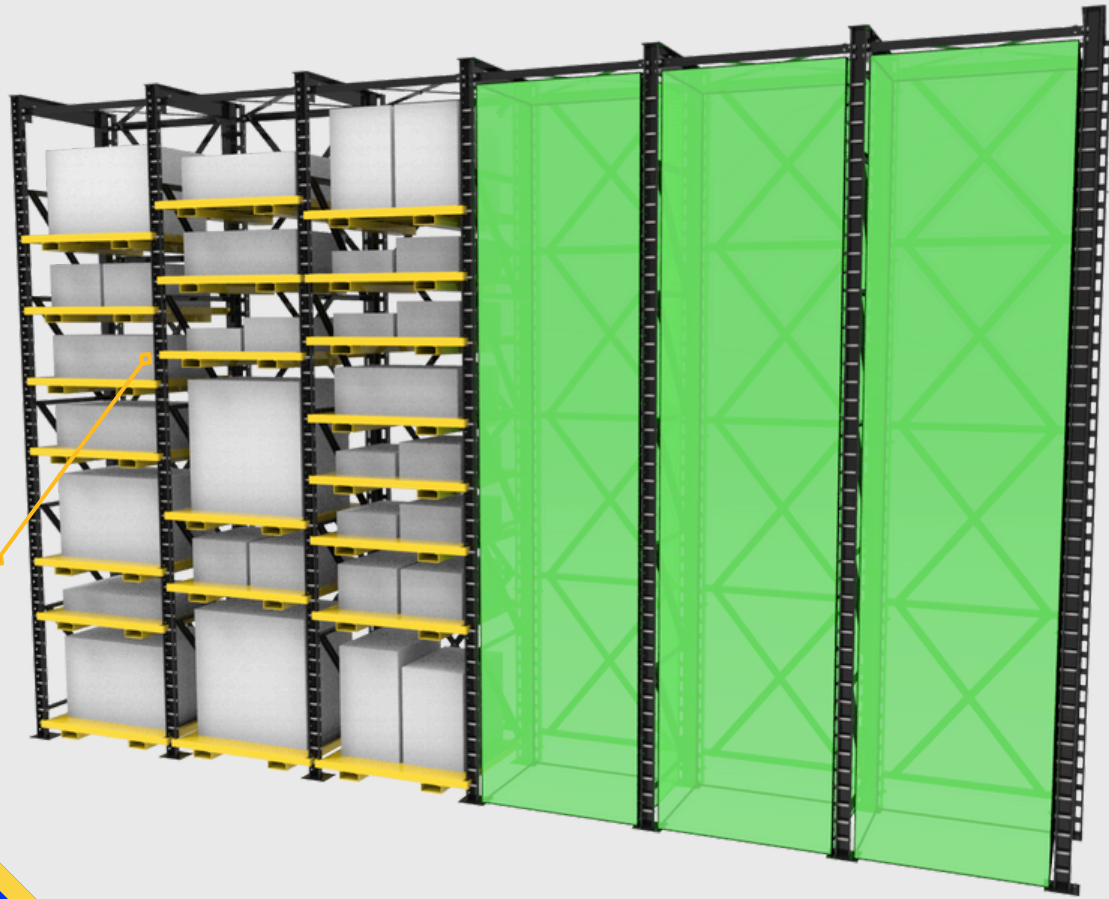

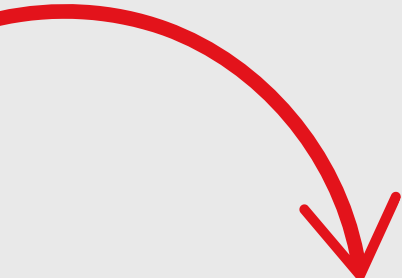

With capacities up to 36,000 lbs and seismic options available, you can store virtually anything critical to your operation.

Reduce misuse. Create efficiency.

More Space. Less Waste.

Traditional pallet racking and storage wastes your floor space and underutilizes your rack space.

MAXRAK helps you regain up to 50% of your usable space.

Free-standing strength you can count on.

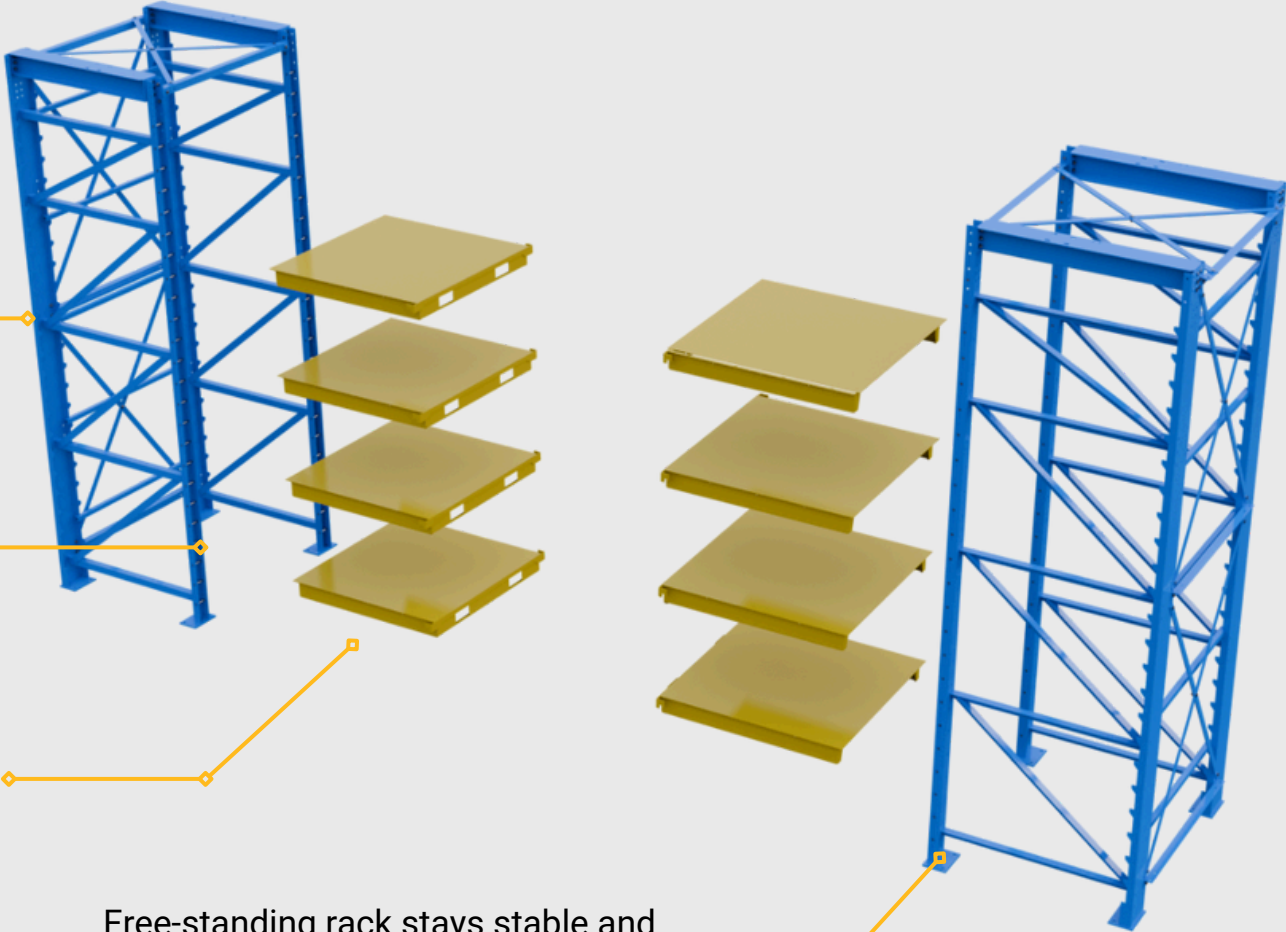

Flexibility on demand

Rack heights up to 25' and 36,000 lbs available.

Load carrier pins on the racking allow for instant height adjustment every 6".

Instantly adjustable load carriers are fully removable from the rack: simply lift and reposition with your forklift.

Free-standing rack stays stable and strong even when empty of load carriers.

Flexibility is key.

Expand As You Grow

The modular design of Maxrak allows you to expand your system as your facility grows and changes.

Find what you need for your space.
