Buffalo, New York.**

# RRAPISTAK

Our products are sold around the globe to multi-national clients.

Some of our customers include:

U.S. AIR FORCE

Maximize your space. Decrease your downtime.

# Time to Roll.

Maximize your storage space by utilizing vertical space more effectively than traditional pallet racking.

Effectively and easily store work-in-process materials.

Access materials quickly and safely.  
Keep things organized.

**SKARAB**  
OPTIMIZE • SIMPLIFY • SECURE

Maximize Your Storage.

# Why choose Skarab?

The Skarab stacker crane is integrated into the racking system. It is always there, ready to work, no forklift needed.

2000 hour scheduled maintenance compared with 500 hours or less for most forklifts.

With probe and cradle options, you get the best utilization of your space by storing rolls using the core, not on pallets.

Our cranes require no batteries and no fuel, bringing down energy costs and reducing your carbon footprint.

**SKARAB**  
OPTIMIZE • SIMPLIFY • SECURE

Reduce misuse. Create efficiency.

# More Space. Less Waste.

Traditional pallet racking and storage wastes your floor space and underutilizes your rack space.

SKARAB helps you regain up to 50% of your usable space.

**SKARAB**  
OPTIMIZE • SIMPLIFY • SECURE

Save your aisles. Eliminate traffic.

# Forklift-free and proud to be.

SKARAB uses less than half the aisle space of traditional forklift and pallet racking systems, maximizing available storage space with a minimal footprint.

**SKARAB**  
OPTIMIZE • SIMPLIFY • SECURE

Compact. Efficient. Safe.

# Reduce downtime. Save space.

The ultra-compact integrated stacker crane has fully motorized lift, travel, and rotation. Available in 2,000-10,000 pound capacities.

## Handled with care.

Multiple handling options to provide you with the best utilization of your space and efficiently and safely improve your work-in-process handling.
